Taxy.io

Bring tax advisory to the next level with us

We need Data scientists

Who we are

Taxy.io is an award-winning tech startup that brings tax advice to the next level with artificially intelligent software. The RWTH Aachen spin-off was started by computer scientists, business engineers and tax advisors in 2018. **We are looking for data scientists to join us and grow with us together.**

What we look for

We are looking for someone who wants to learn new things, develops himself/herself, deals with responsibility and solves problems on his/her own as a member of a great team. You are involved in the product development right from the start and you get insights into various business areas.

At best, you already have experience in the following areas:
- Machine Learning/Deep Learning on text data
- NLP algorithms from preprocessing to topic modelling and word embeddings
- Content-based information retrieval
- Python

Start of your new job can be **as soon as possible**.

What you can expect

- Close collaboration with product development and business colleagues
- An agile development approach
- Flexible working hours and places
- Innovative technological field with the chance to disrupt an industry
- The opportunity to grow professionally and personally

Contact

Contact us with your CV, desired starting date and a salary expectation via **hr@taxy.io**
